## **DETAILED ACTION**

### ***Answer to Applicants' Election with Traverse***

1. Applicants' election with traverse of Group II in Paper No. 9 is acknowledged. The traversal between the restriction of Group IV and I is on the ground(s) that some of the dependent claims are directed to a sheet having tiny microblades with high microblade density and specific trajectory angles, which can only be created by the photoetching/punching process. This is not found persuasive because the broader claims are controlling, therefore, the restriction is proper. In addition, a substantial burden exists when several inventions are examined together, particularly when those inventions are related as product and process of making the product.

The requirement is still deemed proper and is therefore made FINAL.

### ***Specification***

2. Due to the restriction requirement, the title of the invention is now not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed. In addition, it is preferable that the anchoring means be mentioned in the title.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 6, 7, 30 and 31 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Gerstel et al., U.S. '482. See especially column 7, line 41, which corresponds to applicants' species set forth in claim 2, part (v). It is suggested that applicants more carefully claim the anchor.

5. Claims 6, 7, 30 and 31 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Ganderton et al., U.S. '097. See especially column 2, lines 65+, which corresponds to applicants' species set forth in claim 2, part (v). It is suggested that applicants more carefully claim the anchor.

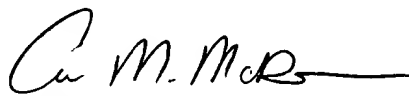

#### *Conclusion*

6. The prior art made of record and not relied upon is considered pertinent to applicants' disclosure. In particular, if the anchors were more carefully defined, it would be obvious to combine the Latterell '110 anchors with the Gerstel et al. '482 drug delivery device.
